Independent Accountants' Review Report

To the Council of JSC "Credit Bank of Moscow"

We have reviewed the accompanying balance sheet of JSC "Credit Bank of Moscow" ("the Bank") as of June 30, 2004, and the related statements of income and other comprehensive income, changes in stockholders' equity and other comprehensive income, and cash flow for the six months then ended, in accordance with Statements on Standards for Accounting and Review Services issued by the American Institute of Certified Public Accountants. All information included in these financial statements is the representation of the management of the Bank.

A review consists principally of inquiries of the Bank personnel and analytical procedures applied to financial data. It is substantially less in scope than an audit in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

Credit Bank of Moscow (the "Bank") was formed on August 5, 1992 as an open joint stock company, then re-registered as a closed joint stock company under the laws of the Russian Federation. On August 18, 1999 the Bank was reorganized as an open joint stock company. The Bank's registered legal address is 4, Marshala Rybalko Str., Moscow, Russia. The Bank possesses a general banking license from the Central Bank of Russia (the "CBR"), granted on January 20, 2001. The Bank is among the 60 largest banks in Russia. The Bank's main office is in Moscow and it has 11 full-scope operations branches in Moscow.

At June 30, 2004 the stockholders of the Bank were as following:

Inform Personal	26%
Centre Servicestroy	15%
Yuriditcheskoye agentstvo	15%
Capital MKB	13%
MKB – Holding	13%
Rossinform	11%
Balansovoye planirovanie	6%
Concern Rossium	1%
Total	100%

(b) Operating environment

The Russian Federation has been experiencing political and economic instability change which has affected, and may continue to affect, the activities of enterprises operating in this environment. Consequently, operations in the Russian Federation involve risks which do not typically exist in other markets. Further in June 2004 the CBR withdrew licenses from a few large and medium sized Russian banks that lead to a weakening in the confidence in the Russian banking system and a high rate of customer deposit withdrawals for many Russian banks. To date the Bank was been able to settle all of its liabilities as they became due and has taken steps to increase its liquidity which included selling a portion of its trading securities and a portion of its retail loan portfolio. The accompanying financial statements reflect management's assessment of the impact of the Russian business environment on the operations and the financial position of the Bank. The future business environment may differ from management's assessment.

NOTE 2 – BASIS OF PREPARATION

(a) Statement of compliance

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

(b) Reporting currency and translation into US dollars

The national currency of the Russian Federation is the Russian Rouble ("RUR"), which is the Bank's functional currency because it reflects the substance of the underlying events and circumstances of the Bank.

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

Management of the Bank has elected to use US Dollar ("USD") as the reporting currency since management believes that this currency is more useful for the users of the financial statements. All financial information presented in USD has been rounded to the nearest thousand.

The financial statements have been translated from functional to reporting currency as follows:

- all assets and liabilities are translated from the functional to the reporting currency at the exchange rate, effective at the reporting date;
- equity items are translated from functional to reporting currency at the historical exchange rates. Translation adjustments arising from translation of equity are included in Other Comprehensive Income in accordance with SFAS 52:
- income statement transactions are translated from functional to reporting currency at the approximate rates, ruling at the dates of the transactions. Translation adjustments arising from translation of equity are included in Other Comprehensive Income in accordance with SFAS 52.

The closing rate of exchange effective at June 30, 2004 and December 31, 2003 was 1 USD to 29.03 Rubles and 1 USD to 29.45 Rubles, respectively.

(c) Convertibility of the Ruble

The Russian Ruble is not a convertible currency outside the Russian Federation and, accordingly, any conversion of Russian Ruble amounts to US dollars should not be construed as a representation that Russian Ruble amounts have been, could be, or will be in the future, convertible into US dollars at the exchange rate shown, or at any other exchange rate.

(d) Going concern

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The accompanying financial statements do not include any adjustments should the Bank be unable to continue as a going concern.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies have been applied in the preparation of the financial statements. These accounting policies have been consistently applied.

a) Use of estimates

Management of the Bank has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with accounting principles generally accepted in the United States of America. Actual results could differ from those estimates.

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

b) Loans to customers

The carrying amounts of the Bank's loans are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the loans' recoverable amounts are estimated.

An impairment loss is recognized whenever the carrying amount of a loan exceeds its recoverable amount.

The recoverable amount of loans is calculated as the present value of expected future cash flows, discounted at the original effective interest rate inherent in the loan.

c) Due from credit institutions

In the normal course of business, the Bank lends or deposits funds for various periods with other credit institutions. Impairment provision for placements with banks and other credit institutions is calculated in accordance with the policy similar to the one applied to loans to customers (refer 3(b) above).

d) Trading securities

Trading securities are carried at market value with the gains and losses recognized in the statement of income.

Included in securities trading profits are realized gains and losses from recording the results of sales and unrealized gains and losses resulting from market value adjustments of trading equity securities.

Included in interest income are coupon income, amortization of premiums and discounts and realized and unrealized gains and losses related to trading debt securities.

e) Repurchase and reverse repurchase agreements

Repurchase and reverse repurchase agreements are utilized by the Bank as an element of its treasury management and trading business. Repurchase agreements are accounted for as financing transactions. As financing transactions, the related securities are recorded in the Bank's accounts and the related payable is included as an amount due to credit institutions or customers, respectively. Any related expense arising from the pricing spreads for the underlying securities is recognized as interest expense.

Reverse repurchase agreements are accounted for as loans and advances to banks or customers. Any related income arising from the pricing spreads for the underlying securities is recognized as interest income.

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

f) Property and equipment

Property and equipment are recorded at historical cost less accumulated depreciation (refer below) and impairment losses (refer accounting policy (h)). Depreciation is provided to write off the cost on a straight-line basis over the estimated useful economic life of the asset. The economic lives are as follows:

	Years
Buildings	50
Furniture and equipment	6
Computers	4
Vehicles	5
Other	5

g) Intangible assets

Intangible assets are recorded at historical cost less accumulated amortization and impairment losses (refer accounting policy (h)). Amortization is provided to write off the cost on a straight-line basis over the estimated useful economic life of the asset. Intangible assets under development are not amortized. Amortization of these assets will begin when the related assets are placed in service. The majority of intangible assets is represented by accounting software.

h) Impairment of property and equipment

The Bank accounts for long lived assets in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets.

Under this standard the carrying value of the asset is considered to be impaired when the anticipated undiscounted future cash flow from such asset is separately identifiable, and is less than the carrying value.

In that event, an impairment loss is recognized based on the amount by which the carrying value exceeds the fair market value of the asset. Impairment losses are recognized in the income statement. Fair market value is determined primarily using anticipated cash flows discounted at a rate commensurate with the risk involved.

i) Interest bearing liabilities

Interest-bearing liabilities are recognized initially at cost, net of any transaction costs incurred. Subsequent to initial recognition, interest-bearing liabilities are stated at amortized cost with any difference between cost and redemption value being recognized in the income statement over the period of the borrowings.

j) Income and expense recognition

Interest income and expense is recognized on an accrual basis. Commissions are recognized when earned. Non-interest expenses are recognized on an accrual basis.

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

k) Dividends

Dividends are recognized as a liability in the period in which they are declared.

1) Taxes

Income taxes are accounted for under the asset and liability method in accordance with Statement of Financial Accounting Standards ("SFAS") No. 109 Accounting for Income Taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates in recognized in income in the period that includes the enactment date.

Russia also has various other operating taxes, which are assessed on the Bank's activities. These taxes are included as a component of non-interest expense.

m) Statement of cash flows

The Bank considers cash on hand, correspondent account with CBR and due from credit institutions with original maturities of three months or less to be cash equivalents.

NOTE 4 – CASH AND DUE FROM CENTRAL BANK

Cash and due from Central Bank comprise:

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

The Bank does not have pension arrangements separate from the State pension system of the Russian Federation. The Russian Federation system requires current contributions by the employer calculated as a percentage of current gross salary payments; such expense is charged to the income statement in the period the related compensation is earned by the employee. The Bank does not have any stock option plans.

NOTE 20 –INCOME TAXES

The provision for income taxes comprises:

	June 30,	June 30,
	2004	2003
Current tax charge	391	102
Deferred taxation	752	935
Taxation	1,143	1,037

Russian legal entities must report taxable income and remit income taxes thereon to the appropriate authorities. The income tax rate for the Bank is 24%.

The effective income tax rate differs from the statutory income tax rates. A reconciliation of the provision for income taxes based on statutory rates with the actual income tax expense follows:

	June 30, 2004	June 30, 2003
Income before tax	4,931	4,632
Applicable statutory tax rate Income tax using the applicable tax rate	24% 1,183	24% 1,112
Net non-deductible costs and non-taxable income	(40)	(75)
	1,143	1,037

Accumulated temporary differences between the carrying amounts of assets and liabilities reflected in these financial statements and their bases for local taxation purposes give rise to a net deferred tax liability of USD 6,407 thousand as of June 30, 2004 (December 31, 2003: USD 5,655 thousand). The net change in the deferred tax liability has been recognised in the income statement. This deferred tax liability is attributable to the following items, listed below at their tax effected values:

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

	June 30, 2004	December 31, 2003
Property and equipment	(201)	(51)

Provisions	6,572	5,581
Other	36	125
Deferred tax liabilities	6,608	5,706
Net deferred tax liability	6,407	5,655

The applicable deferred tax rate for the Bank is 24% (December, 31 2003: 24%).

NOTE 21 – COMMITMENTS AND CONTINGENCIES

a) Financial commitments

Undrawn loan commitments and guarantees at June 30, 2004 and December 31, 2003 comprise:

	June 30, 2004	December 31, 2003
Commitments given		
Undrawn loan commitments	12,873	11,073
Guarantees	34,487	34,127
	47,360	45,200

At June 30, 2004 the Bank provided for potential losses on guarantees in the amount of USD 1,602 thousand, December 31, 2003: USD 2,121 thousand.

c) Legal

Bank management is unaware of any significant actual, pending or threatened claims against the Bank.

d) Insurance

The insurance industry in the Russian Federation is in a developing state and many forms of insurance protection common in other parts of the world are not yet generally available. The Bank does not have full coverage for its premises and equipment, business interruption, or third party liability in respect of property or environmental damage arising from accidents on Bank property or relating to Bank operations. Until the Bank obtains adequate insurance coverage, there is a risk that the loss or destruction of certain assets could have a material adverse effect on the Bank's operations and financial position.

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

e) Tax

The taxation system in the Russian Federation is relatively new and is characterized by numerous taxes and frequently changing legislation which is often unclear, contradictory, and subject to interpretation. Often, differing interpretations exist among numerous taxation authorities and jurisdictions. Taxes are subject to review and investigation by a number of authorities, who are enabled by law to impose severe fines, penalties and interest charges.

These facts may create tax risks in the Russian Federation substantially more significant than in other countries. Management believes that it has adequately provided for tax liabilities based on its interpretation of tax legislation. However, the relevant authorities may have differing interpretations and the effects could be significant.

NOTE 22 – CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise:

	June 30, 2004	June 30, 2003

NOTE 23 - RELATED PARTIES

The outstanding balances and related average interest rates as of June 30, 2004 and December 31, 2004 with related parties are as follows:

	June 30, 20	004	December	r 31, 2003	
	Amount	Average effective interest rate	effective interest		
Assets Loans to customers, gross	25,083	14.0%	18,764	12.9%	
Liabilities Deposits by customers	586	2.1%	820	2.1%	

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

Material amounts included in the income statements for 6 months ended June 30, 2004 in relation to transactions with related parties are as follows:

	June 30, 2004	June 30, 2003
Interest income on loans to customers	1,394	1,037

NOTE 24 - CAPITAL ADEQUACY

The Bank's risk based capital adequacy ratio as at June 30, 2004 and December 31, 2003 was 30% and 28%, respectively, which exceed the minimum ratio of 8% recommended by the Basle Accord.

NOTE 25 – FAIR VALUE OF FINANCIAL INSTRUMENTS

The following disclosure of the estimated fair value of financial instruments is made in accordance with the requirements of SFAS No.107. The Bank has performed an assessment of its financial instruments to determine whether it is practicable within the constraints of timeliness and cost to determine their fair values with sufficient reliability.

The Bank has concluded that due to the lack of liquidity and published "indicator interest rates" in the Russian markets, and the fact that some of its transactions are with related parties and of a specialized nature, it is not possible to determine the fair value of the obligatory reserve deposits with CBR, loans to customers, deposits by customers, promissory notes and certificates of deposit.

The financial assets and financial liabilities that the Bank does believe it is able to estimate fair values for are as follows:

	June 30,	, 2004	December 31, 2003		
	Carrying value	Fair value	Carrying value	Fair value	
Financial Assets Cash and correspondent account with CBR	18,941	18,941	40,422	40,422	
Due from credit institutions, net	38,640	38,640	42,903	42,903	
Trading securities Financial Liabilities	3,996	3,996	22,354	22,354	
Deposits by credit institutions	59,492	59,492	60,279	60,279	

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Notes to financial statements June 30, 2004 (All amounts in thousands of US Dollars)

Cash and correspondent account with CBR, due from credit institutions and deposits by credit institutions: the carrying amounts approximate fair value because of the short maturity of these instruments.

Trading securities: the fair values are based on quoted market prices for these or similar instruments

This estimate of fair value is intended to approximate the amount at which the above listed assets could be exchanged in a current transaction between willing parties. However given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realizable in an immediate settlement of the instruments.

NOTE 26 – RISK MANAGEMENT POLICIES

Management of risk is fundamental to the banking business and is an essential element of the Bank's operations. The main risks inherent to the Bank's operations are those related to credit exposures, liquidity and market movements in interest rates and foreign exchange rates. A description of the Bank's risk management policies in relation to those risks follows.

Credit risk

The Bank is exposed to credit risk which is the risk that a counterparty will be unable to pay amounts in full when due. The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to industry and geographical segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and principal repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral and corporate and personal guarantees.

Guarantees and standby letters of credit, which represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are frequently fully or partially covered by the funds deposited by customers and therefore usually bear limited credit risk.

With respect to undrawn loan commitments the Bank is potentially exposed to loss in an amount equal to the total amount of such commitments. However, the likely amount of loss is less than that, since most commitments are contingent upon certain conditions set out in the loan agreements. The geographical concentration of monetary assets and liabilities follows:

Currency risk

The Bank is exposed to effects of fluctuation in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors sets limits on the level of exposure by currencies. These limits also comply with the minimum requirements of the Central Bank of Russia. The Bank's exposure to foreign currency exchange rate risk is as follows:

Liquidity risk

The Bank is exposed to daily calls on its available cash resources from overnight deposits, current deposits, maturing deposits, loan draw downs and guarantees. The Bank maintains liquidity management with the objective of ensuring that funds will be available at all times to honor all cash flow obligations as they become due. The Bank's Asset and Liability Management Committee sets limits on the minimum proportion of maturing funds available to cover such cash outflows and on the minimum level of interbank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand.

The contractual maturities of monetary assets and liabilities as of June 30, 2004 and December 31, 2003 are as follows:

Interest rate risk

The Bank is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. Interest rate risk is measured by the extent to which changes in market interest rates impact margins and net income. To the extent the term structure of interest bearing assets differs from that of liabilities, net interest income will increase or decrease as a result of movements in interest rates. The Bank's expected repricing and maturity dates do not differ significantly from the contract dates, which are disclosed in the liquidity risk table above.

Interest rate risk is managed by increasing or decreasing positions within limits specified by the Bank's management. These limits restrict the potential effect of movements in interest rates on interest margin and on the value of interestsensitive assets and liabilities.

The Bank's interest rate policy is reviewed and approved by the Bank's Assets and Liabilities Management Committee. The Bank's average effective interest rates as at June 30, 2004 and December 31, 2003 for interest bearing monetary financial instruments follow.
